ABOUT ME

I am Priyansh Bhatt - notesatan on Github, an aspiring software developer, currently pursuing bachelors in computer science

I have a passion for programming and am eager to learn new technologies. I have experience working in both team and self-directed settings, using Object Oriented languages, developing, debugging, refactoring, testing, profiling, and general software development life-cycle

PERSONAL PROJECTS

auto-sub

Jan 2021 - Feb 2021

A **command-line** utility to batch-add subtitles, attachments, chapters, tags to media files. Makes calls to FFmpeg in the backend. Includes **unit tests**, **CI/CD pipeline** to run tests with every push, and a pipeline to generate binaries with every release

Written in **Go**. Also **available on AUR** as auto-sub

kodi-strm

Sep 2020 - Sep 2020

Command-line script to supplement the Google Drive Add-on in Kodi. Generates .strm for media files present on Google Drive.

Written in **Python**. Involves usage of **Google OAuth API**, and **Google Drive API**

EDUCATION

Bachelors in Computer Science

Mar 2018 - Mar 2022

UPES, Dehradun

Work Experience

Software Developer Intern

March 2022 - Present

eSamudaay

Part of a team of five, responsible for three mobile apps - on **Android** and **iOS**. Primarily used **Flutter/Dart**. Used **Jira** to track progress, **Git** to collaborate, **Bitbucket CI/CD** pipelines to generate builds and deploy

Fight Against MisInformation - Volunteer

May 2020

MyKartavya

Raised awareness about misinformation being spread through Social Media. Educated ten people about the harms of falling for such misinformation
